

PARCEL LOCKER SOLUTIONS

Safe and secure item distribution for commercial offices

Whether your company is adopting a hybrid or complete return-to-office policy following the pandemic, one thing is certain. Employees wish to feel as safe and secure as possible when in the office environment.

Many employees will bring with them a new level of awareness around hygiene and social distancing, and an expectation that interactions with other employees and physical items will be limited.

Those within the business who manage the physical handover of everyday items such as paperwork, equipment and mail can play a key role in implementing a safer, more secure return-to-work strategy that supports flexible working.

Smart Parcel Lockers by **SMARTECH** provide a secure, contactless, self-service solution that eases package management challenges by offering a quick, easy and convenient way to deliver and retrieve packages.

REDUCE OPERATIONAL COSTS

SMARTECH Parcel lockers eliminate the time-consuming, manual process of accepting, logging, sorting, and distributing packages. Liability concerns related to lost or stolen items are alleviated, boosting overall security and recipient satisfaction.

CONTACTLESS SELF-SERVICE

SMARTECH Parcel Lockers enable a touchless item collection and return process. The locker can be opened via the recipient's smartphone, requiring no physical contact with the screen. Dropping off or collecting goods from the locker takes seconds, supporting social distancing by eliminating long queues and safeguarding employees' health by reducing person-to-person contact.

CARRIER AGNOSTIC

SMARTECH Parcel Lockers are carrier-agnostic, meaning a variety of delivery carriers may deliver to and collect from our lockers. You can set up any number of employees as internal 'carriers', giving them the ability to deposit items into the locker, for example, mailroom staff, the facilities team or the IT department. This provides employees and staff with a convenient, self-service option for item exchange.

IMPROVED OPERATIONAL EFFICIENCY

Providing safety and security for both indoor and outdoor environments, our parcel locker solutions are engineered to protect items rain or shine. The locker's strong metal body keeps the contents safe from damage and theft, while the sleek and customisable design easily integrates to your specific space requirements.

EASILY SCALE AS YOUR BUSINESS NEEDS GROW

Our lockers seamlessly evolve to grow with your business. As the number of employees or departments grow and usage increases, add additional locker columns or machines as needed for effortless scalability.

BEYOND PARCEL DELIVERY

Our parcel lockers can be leveraged for the distribution of business-related materials within a seamless, connected process. From IT equipment to important documents and maintenance items, **SMARTECH** parcel locker solutions simplify distribution with a contactless, intuitive process.

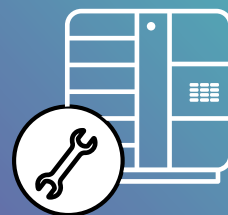

Fully customisable

Customise your parcel locker with colours or wraps to match your business' branding or location aesthetics. Choose from a selection of locker sizes to accommodate a variety of dimensions.

Advanced reporting and analytics

Smart Parcel Locker by **SMARTECH** offers a cloud-based platform for efficient parcel locker network management. Our platform provides real-time monitoring and alerts to keep track of your installed base while providing user and device management tools, tracking, and notification management.

Worry-free maintenance

SMARTECH provides the help you need to get up and running quickly. We support the entire installation process from start to finish. For any maintenance required, our technicians are available to provide on-site support and repairs.
