Standard Indoor Locker System

SMARTECH Standard Indoor Locker Systems are designed and engineered for multiple package management applications that facilitate a seamless and convenient package delivery and return process, from Click-and-Collect, to university campuses and residential properties.

SMARTECH's Smart Parcel Lockers make package management simple, freeing up time and space for more efficient delivery, collection, and return process.

Locker system specifications

- 18-gauge double-reinforced cold-rolled steel construction
- Operational conditions: temperature +5° to +35° C - humidity up to 80% non-condensing
- Control towers feature an industrial-grade indoor touchscreen, a camera for photo capture, a keypad, a scanner supporting 1D and 2D barcode reading, and speakers
- Each door features smart package sensors to detect packages and other items
- Keypad and touchscreen are located within an accessible range. Users with accessibility requirements can request items be delivered to lower-level lockers
- Locker system is anchored on the wall or on the ground depending on setup and location
- Each tower is bolted and secured together
- Lockers are RCM marked
- Lockers are RoHS and REACH compliant

Colors

Traffic White (RAL 9016)
